

Overnight Camp Pre-Camp Symptom Screening Form (NOT REQUIRED FOR DAY CAMPERS)

Virginia's Safer at Home Phase 3 guidelines require overnight summer campers to either be tested for Covid-19 with a molecular test within 7 days prior to camp arrival; or perform a pre-camp 14-day symptom screening (for the camper and family) and a limitation of close contacts.

This form is for utilizing the option of a pre-camp 14-day symptom screening and limitation of close contacts. You do not need this form if you have chosen to have your camper turn in results of a Covid-19 molecular test.

The VA guideline states:

"All camps must develop and implement a plan to decrease the risk of infectious campers and staff entering the camp environment. This plan must include, but shall not be limited to, the requirement for a negative molecular test within seven days prior to the beginning of camp, or 14-day symptom screening for the camper and all persons in the Family as defined in Executive Order 72 that have contact with the camper. Campers utilizing symptom screening must restrict their close contacts to those inside their Family as defined in Executive Order 72 for the duration of the 14- day period." [Reference link](#) (pg. 32-35)

All daily screenings must include checking for the following symptoms:

- Temperature check- Fever (temperature 100.4 °F or higher)
- Sore throat
- New cough
- Diarrhea, vomiting, or stomachache
- New onset of severe headache, especially with a fever.
- Other symptoms that may include chills, nasal congestion or runny nose, new loss of taste or smell, shortness of breath or difficulty breathing, tiredness, muscle or body aches, or poor appetite.

Question- What do I do if my camper or someone they have been in contact with experiences any of the symptoms within the 14-day screening period?

Answer- Document it on your screening chart. Call your doctor. Parents (or guardians) and your doctor can decide together how to proceed with treating your child's symptoms. Tell your doctor that your child is attending an overnight camp soon. Ask your doctor if they can still attend. There are many reasons your child (or others) might exhibit symptoms- strep, colds, flu. Your doctor may or may not recommend a Covid-19 test. Please have your doctor write a letter to Camp Piankatank stating that the child is not contagious and may attend overnight camp.

Your child **MUST** be fever free for 48 hours prior to arrival date. Obviously if the child, or anyone they have been in contact with, tests positive for Covid-19 they cannot attend camp. A person with a pending Covid test should wait until results are known before attending camp.

This form must be complete with no missing information and handed to camp staff upon arrival, if this is your chosen Covid screening option. We cannot provide copies of this form, please make a copy for your own records before arriving at camp.

If you have questions, please call Camp Piankatank at 804-776-9552 or email us at office@camppiankatank.org. Summer Camp Director Kristen Ryan can be reached at kristen.ryan@camppiankatank.org.
